GreenClean
Water & Waste Services

"Recognized by local municipalities as a quality provider."

GREEN CLEAN UNDERSTANDS THE IMPORTANCE OF YOUR PROPERTY INVESTMENT AND KNOWS WHAT IT TAKES TO PROPERLY MAINTAIN YOUR REAL ESTATE

Regular power washing maintenance provides an attractive climate for homeowners, buyers and tenants while maintaining your property's overall value. Built up dirt and grime can lead to premature deterioration of pavement, tiles, paving stones and other hard surfaces. The proper cleaning and scheduled maintenance prolongs the life of your property materials preventing damage that leads to expensive replacement cost and a diminished appearance of your home. Power washing maintenance provides a clean and inviting environment for family and guests that all will enjoy!

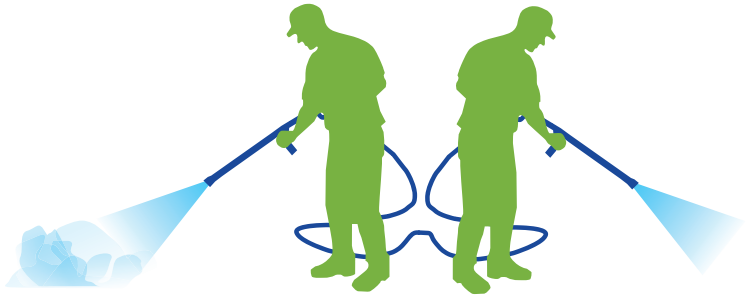
*Products used by Green Clean are environmentally friendly.

Power Washing vs Pressure Washing



- Power Washing uses a heated, high-Pressure stream of water to penetrate through layers of dirt, grime, mildew, and other things sticking to hard surfaces.
- Infuses high temperature heated water prior to application.
- Provides a deeper clean, at high temperature, without the use of chemicals.

- Pressure Washing uses a high-Pressure stream of water to penetrate through layers of dirt, grime, mildew, and other things sticking to hard surfaces.

Why Reuse: It's our zero waste initiative to protecting our environment, oceans, bays and waterways. This philosophy is the driving force behind what we do and why we do it. Our Best Management Practices have been developed with a focus on Sustainability and eliminating waste, with quality assurance built in at the core of our services.

What: We Recycle by offering strategic planning and alternative solutions to water and solid waste management. Our transportation and distribution logistics are strategically aligned with facilities who use sustainable methodology. Both liquid and sold waste are identified, diluted and processed. The waste is either neutralized, evaporated, repurposed or returned to its natural form. This management process minimizes the quantities of waste being disposed of in our landfills or burned in industrial incinerators.

How: We Reclaim all contaminated wastewater with industrial high capacity vacuum systems. We manage a fleet of Vacuum Tank Waste Haulers, providing transportation to approved and certified Transportation Storage Disposal Facilities (TSDF). "We guarantee Compliance!"
